

HCA-RA Right Angle Series LVDTs

DESCRIPTION

HCA-RA right angle series LVDTs are tungsten-inert gas (TIG) welded for hermetic sealing with an easy to install radial connector termination. A design improvement to the standard HCA series, the HCA-RA has a through bore design and a right angle connection for applications where product length is an issue.

The HCA-RA series can withstand up to 1000psi of external pressure. The through bore design stops debris from being trapped inside

the body. The HCA-RA radial connector mount saves space not only in the unit length, but also in the mating connector and cable bending radius.

Note: This option is also available for the HCD, HC485, HCT, HCT-IS, GCA, GCD, GCD-SE, GC485
