

AccuStar® II/DAS 20

Dual Axis Clinometer

DESCRIPTION

AccuStar® II/DAS-20 combines the function of two clinometers in one package. The unique dome shaped design features a capacitance based sensor which produces output signals directly proportional to the relative tilt in two axes.

Designed for high volume applications, AccuStar® II/DAS-20 is priced to compete with much less capable mercury switches and other low cost level sensors.

There are four output connections providing a choice of ratiometric, pulse width modulation (PWM) digital output. A mating connector (sold separately) provides the user with an easy plug-in connection. Null and scale factor are adjustable.

FEATURES

- ◆ Microprocessor-Based Electronics
- ◆ Two Clinometers In One Package
- ◆ Adaptable Design DC Powered
- ◆ Ratiometric and PW Digital Output in One Model
- ◆ Trimmable Outputs

APPLICATIONS

- ◆ Platform Leveling
- ◆ Measure Pitch and Roll
- ◆ Tip Over Protection for Manlifts
- ◆ Automatic Leveling Systems
- ◆ Wheel Alignment

Physically the sensor is composed of two hermetically sealed domes spaced about 1/8" apart. The lower, polyester plastic dome has 4 capacitive plates while the aluminum, upper dome acts as a ground. A fluid with a high dielectric constant is sealed within the dome sandwich, leaving an air bubble space about the size of a quarter. The bubble is centered at level position and will move from one side to the other as the device is tilted.
