

Vehicle Sensors

Also:

- Digital FM Telemetry
- Custom Strain Gaging
- Slip Ring Assemblies
- Complete Testing Services

Sensor Developments is pleased to offer a full line of force and torque sensor products for vehicle manufacturers to evaluate their equipment.

In the following section, you'll find a wide assortment of products to test the performance of your vehicles, either on the road performance or in the laboratory. These sensors and our custom strain gaging abilities have been used on many different vehicle types and in a variety of industries. Some examples include recreational vehicles, motorcycles, golf carts, construction equipment, agricultural equipment, automotive (hybrid electric, commercial passenger, light truck, SUV), heavy truck, military vehicles, and race cars.

Should a sensor not meet your immediate requirements, please contact one of our application engineers for assistance. We'll be happy to work with you to address your measurement needs.
